Hi Jason, I brought your suggestion below to the transboundary task group's co-chairs and they do not support including other mining proponents for this project because: the project is wrapping up, there's no indication that the proponents would be contributing any resources or expertise (or could be required to do so), and the data from the project will be publicly available. If you'd like to discuss the issue further in the context of this task group, please reach out to Eric and Doug.

Thanks,

Mich

Subject: RE: Koocanusa Transboundary Monitoring Task Group - 2019 Field Work Report Back

Hi Mich,
Thanks for sending this out.

One possible agenda item (maybe more of a "deep thought")... I hear through the grapevine that the proponents from the new Michel Creek mine may want to participate in future "Koocanusa" discussions. I'm not sure how and where we would include them in our discussions. Maybe this is something to think about for THIS group?

Note: I'm not proposing to invite them to this particular meeting, I'm just saying that we need to think about how to include them in the future.

That's it, thanks!
Jason

Subject: Kooacanusa Transboundary Monitoring Task Group - 2019 Field Work Report Back

Importance: High

Good morning everyone,

As you may recall, back in January a subgroup of the Kooacanusa Transboundary Monitoring Task Group broke off to settle some technical/logistical questions in order to get ready for 2019 field work.

I am pleased to report those discussions are complete and the subgroup is ready to report back to the full task group. Please fill out the doodle poll below so we can reconvene the full group before field work begins.

<https://doodle.com/poll/dugr24wzqcm4mtrw>

Attached is a summary of the sub-group's work, and a proposed agenda for a full task group call. Also attached are two updated documents; a small update to the sampling matrix based on the sub-group's discussion (flagged in tracked changes), and US-ACE's updated 2019 Sampling Plan.

Please fill out the doodle poll and send me any comments/proposed changes for the agenda by end of day Wednesday April 17

Apologies for the limited number of time slots for this meeting; please be flexible and accommodate as many of the options as possible.

Thank you,
Mich
